

PRODUCT SPECIFICATIONS

ManureMagic® is organic, highly concentrated and utilizes millions of nanobioreactors to deliver hundreds of billions of curated microorganisms that consume solids associated with animal production. In addition to reducing nuisance issues such as solids, odor, crust formation, and gas/foam build up, ManureMagic has been proven to improve animal feed efficiency, producing a healthier animal, at a higher weight, in less time. It can also increase the barn survival rate resulting in higher incremental revenue per animal.

APPLICATION

Apply ManureMagic directly to waste, lagoon, storage or flush pit. Apply ManureMagic by hand or with the provided scoop. Ensure that ManureMagic is applied to the liquid portion of the manure, beneath any existing crust. In deep pits, apply in each corner and every 50 feet along the outside walls. Reapply ManureMagic after each major pumping. Lagoons should be divided into equal applications around the lagoon perimeter. Additional applications are recommended for every six months. For every 1 million gallons of manure storage, Apply:

- A. Swine (deep pits) – 50 pounds ManureMagic every time the pit is pumped
- B. Swine (pull-plug) – 2 pounds of ManureMagic every month. Repeat after each pull plug
- C. Dairy (slatted floor pits) – 50 pounds ManureMagic every 6 months
- D. Beef (slatted floor pits) – 75 pounds ManureMagic every 6 months
- E. Dairy (lagoons) – 38 pounds ManureMagic every 6 months
- F. Beef (lagoons) – 50 pounds ManureMagic every 6 months

Example: For a million gallon pull plug pit that is pulled every 7 days, 0.5 pound of ManureMagic should be added after each plug pull.

STORAGE

ManureMagic can be applied during all seasons. Microbe activity will be higher during warmer temperatures, but will also be effective in colder conditions. Shelf life is 5 years when stored in a cool dry place. Do not store in excess of 120°F for extended periods.

PACKAGING

Available in 25 pound pails, 50 pound bags, and 2,200 pound totes.

Standard pallets hold 36 pails, 20 ft. Containers hold 360 pails, Full Truckloads hold 936 pails
