

BOOSTING WASTEWATER TREATMENT WITH AQUA ASSIST

Aqua Assist is a dry-to-the-touch product formulated with engineered inorganic and porous particles seeded with mixed microbial cultures. Aqua Assist boosts the processing power of your wastewater treatment plant by accelerating the natural breakdown of biosolids into water and CO₂.

Aqua Assist is an easy-to-use dry product that **REQUIRES NO MIXING** at a daily dose of only 2 lb per 1 MGD.

Aqua Assist **REDUCES BIOSOLIDS PRODUCTION BY UP TO 50%** while improving wastewater treatment plants' overall performance.

Many wastewater treatment plants are operating at or near their maximum capacity. The more biosolids they process, the higher their operating costs and the bigger the strain on their systems.

OUR PARTICLES PROVIDE 100X MORE DENSITY

Every pound of product provides the equivalent of 12 football fields of surface area loaded with beneficial microbes.

OUR PARTICLES SINK

Go straight to the food source and improve flocculation.

OUR PARTICLES IMPROVE OPERATIONS

A high-performing microbial community means smoother operations and easy compliance with permit requirements.

OUR PARTICLES IMPROVE RESILIENCE

Improved settling leads to demonstrated higher resilience in the face of extreme weather events such as hurricanes and floods.

OUR PARTICLES REDUCE BIOSOLIDS BY UP TO 50%

Less biosolids translates into savings on sludge processing and disposal.

LESS SPENDING

MORE CONTROL

NO CAPEX

Aqua Assist is cost effective and zero footprint, saving resources, improving operational efficiency, and reducing environmental impacts—all without capital investment.

JUST ADD SCOOPS OF THE PRODUCT AND LET NATURE DO ITS WORK.
