Aqua Assist is a dry-to-the-touch product formulated with engineered inorganic and porous particles seeded with mixed microbial cultures. Aqua Assist boosts the processing power of your wastewater treatment plant by accelerating the natural breakdown of biosolids into water and CO₂.

Aqua Assist is an easy-to-use dry product that REQUIRES NO MIXING at a daily dose of only 2 lb per 1 MGD.

Aqua Assist REDUCES BIOSOLIDS PRODUCTION BY UP TO 50% while improving wastewater treatment plants’ overall performance.

Many wastewater treatment plants are operating at or near their maximum capacity. The more biosolids they process, the higher their operating costs and the bigger the strain on their systems.

Aqua Assist boosts the processing power of your wastewater treatment plant by accelerating the natural breakdown of biosolids into water and CO₂.

Aqua Assist is an easy-to-use dry product that REQUIRES NO MIXING at a daily dose of only 2 lb per 1 MGD.

Aqua Assist REDUCES BIOSOLIDS PRODUCTION BY UP TO 50% while improving wastewater treatment plants’ overall performance.

Aqua Assist is cost effective and zero footprint, saving resources, improving operational efficiency, and reducing environmental impacts—all without capital investment.

Just add scoops of the product and let nature do its work.
